

Prevent the spread of
CONJUNCTIVITIS
.....(Sore Eye)..... 

The current epidemic is caused by adenovirus.

Avoid hand to eye contact by touching infected objects.

Warm compress and cleaning your eyes regularly with water will help.

Avoid close contact with infected person.

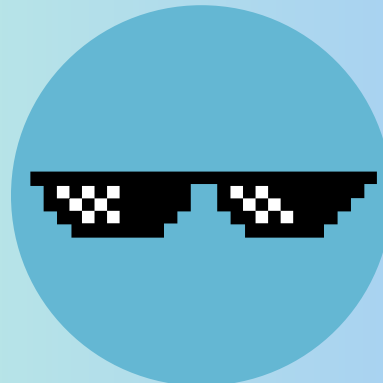

Antibiotics won't be useful.

Maintain hand hygiene.

Consult an eye doctor if the symptoms are severe or in case of any doubt.

Sunglasses can give relief from light, but they do not stop the spread.
